

Tatjana Rmus is Director of Power Generation Business Operations and Planning at Pacific Gas & Electric Co., where she leads financial planning, investment strategy, and operational governance for the company's power generation portfolio. In this role, she is responsible for long-term financial planning, capital allocation, internal controls, and risk-based investment decision-making, including securing external funding and advancing major capital programs.

Tatjana brings broad utility experience spanning 20 years in electric, gas, nuclear, and hydro operations, providing a comprehensive perspective aligned with EUCG's cross-technology membership. She has deep expertise in financial stewardship, governance, and fiduciary oversight, with a track record of strengthening financial controls, improving planning processes, and managing complex, multi-billion-dollar portfolios. Previously, she led electric investment planning for a large-scale portfolio, driving regulatory strategy, performance management, and capital prioritization.

She holds an MBA and a Bachelor of Applied Science in Chemical Engineering, and has also completed executive education at Stanford University and UC Berkeley. Tatjana is an active EUCG member and is committed to supporting its mission through transparent financial management, strong governance, and delivery of member value.
