Hydroelectric Productivity Committee

About Us

The Hydroelectric Productivity Committee (HPC) provides the standard in the hydroelectric industry for energy performance information. The mission of the HPC is to assist member companies in achieving operational excellence by providing relevant, accurate, and timely benchmark information on cost, performance, and best practices. The HPC will provide comparative operating and maintenance performance information on hydroelectric facilities and provide forums for members to optimize performance. With workshops in the Spring and Fall each year, committee members benefit from networking with professionals in operations, engineering, asset management, and leadership positions at various hydro utilities. A key competitive advantage of membership is the committee's flexibility to address different topics and the speed with which one can obtain information directly from the source.

Benefits

Network Opportunities

Regular opportunities to network with other hydro generating companies across North America and internationally in a confidential and safe environment. True one-to-one connections and real relationship development with other companies and individuals that are facing the same situations as you and your company.

Forums

Active participation in a collaborative forum for the discussion of best practices and lessons learned on topics identified by members.

Spring and Fall Workshops

Facilitate learning and exchange ideas with peers at two workshops. Discuss current industry issues, best practices, and lessons learned on topics identified by members.

Resource Library

Access to members-only online Resource Library where presentations by members are stored for other members to use for their benefit.

Data

Benchmarking through cost and performance data collection and dissemination on critical and timely topics identified by members.

2025 Hydroelectric Membership Fees

Data Member Annual Fee

Electric utilities that participate in the committee benchmark process, the best practice forums, and related information exchanges. These members have access to the benchmark database on a "give to get" basis.

\$7,425

Alliance Member

Members participate in best practice forums and related information exchanges, but do not participate in the benchmark process.

\$11,220

The Hydroelectric Productivity Committee is a part of EUCG, a non-profit trade association that has brought utility companies together to participate in studies, learn from each other, and share best practices since 1973. EUCG's vision is to be the leading association of global energy organizations enabling our members to optimize resources, drive performance excellence and deliver value to customers.

Membership on EUCG's Hydroelectric Committee provides our team access to vital information which helps us to effectively evaluate our financial performance relative to industry peers in Hydro Generation. Team meetings with industry peers and experts are engaging and provide an excellent forum to share ideas on issues and opportunities affecting our industry. This collaboration helps to identify tangible opportunities where we can implement performance improvements.

—Rob Mager, Advisor-Data Analytics, Ontario Power Generation

Current Member Companies As of January 1, 2025

Bonneville Power Administration	Pacific Hydro
Chelan Public Utility	PG&E
Duke Energy	Seattle City Light
Hydro Quebec	Tennessee Valley Authority
NB Power	U.S. Army Corp of Engineers
Oak Ridge National Laboratory	U.S. Bureau of Reclamation
Ontario Power Generation	Volta River Authority

EUCG Mission

EUCG's mission is to promote end-to-end energy production and delivery excellence by:

- Providing relevant, accurate and timely benchmarking information on cost and performance
- Promoting outstanding cross functional networking opportunities
- Establishing a forum for direct exchange of best practices and lessons learned

Board Members

- Andrew Campbell**, President, TVA
- Evelyn Grant**, Treasurer, Lower Colorado River Authority
- Wanda Wilkerson**, Secretary, Oncor Electric Delivery
- Adam Preveau**, Innovation and Technology Director, Entergy
- Ives Zaldumbide**, Marketing Director, PG&E
- Stephanie Maggard**, Ex-Officio, PG&E
- Jeff Davis**, Nuclear Committee Chair, DTE
- Heather McDowell**, Hydro Committee Chair, Seattle City Light
- Jeannine Beran**, T&D Committee Chair, Exelon Utilities
- Billy Sabin**, Solar Committee Chair, TVA
